At FIRST SHAMROCK CARE CENTER, we provide professional nursing in a supportive environment that encourages and assists patients in regaining self-sufficiency and independence for their return home.

## Our Care:

### LONG TERM CARE

Our dedicated, certified and licensed staff encourages and assists each resident with daily grooming, bathing, dressing and medications. We provide a variety of scheduled activities to promote an active and fulfilling lifestyle. Plus, we all feel better when we are surrounded by the things we love and enjoy, so families are encouraged to decorate their loved one's room to make for a more home like feeling. Each resident's room becomes their own "little home," with pictures, quilts or a favorite chair to bring comfort and speed the healing process.

### SKILLED UNIT

When a loved one is discharged from the hospital, families are often unable to provide the care that is required to help them recuperate. Patients recovering from a stroke, hip or knee replacement, for example, can speed their recovery considerably when they are in a proper caregiving environment. Our highly trained staff at FIRST SHAMROCK CARE CENTER, including registered nurses (RNs), licensed practical nurses (LPNs), and certified nursing assistants (CNAs), work together with physical, speech and occupational therapists to provide the best care possible for each resident.

### THERAPY SERVICES

The nursing team at FIRST SHAMROCK CARE CENTER recognizes that therapy is often the key to recovery, and we stand beside you, ready to help to hasten your recuperation.
